Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims

IN THE CLAIMS

Claim 1 (Currently amended). A method for treating the effects of low LDL-cholesterol values in the brain on cognitive performance or other central nervous system functions of a patient, other than one diagnosed as suffering from Alzheimer's disease, by modulating nicotinic receptors, said method comprising determining the LDL-cholesterol value for such patient and administering an effective amount of a nicotinic allosteric potentiator an acetylcholinesterase inhibitor, nicotine, a nicotinic agonist or a mixture thereof to a patient other than one diagnosed as suffering from Alzheimer's Disease who has been determined to have an a serum-LDL-cholesterol level of below 109 mg/dl.

Claim 2 (canceled).

Claim 3 (Previously Presented). A method as claimed in claim 1 wherein said low cholesterol values are the result of treatment with HMG-CoA reductase inhibitors.

Claim 4 (Previously Presented). A method as claimed in claim 1 wherein said modulation of nicotinic receptors is effected by administering an effective amount of a galanthamine or lycoramine analog to a patient in need of such modulation.

Claim 5 (Withdrawn). A method as claimed in claim 2 wherein said modulation of nicotinic receptors is effected by administering an effective amount of a galanthamine or lycoramine analog to a patient in need of such modulation.

Claim 6 (Withdrawn). A method as claimed in claim 3 wherein said modulation of nicotinic receptors is effected by administering an effective amount of a galanthamine or lycoramine analog to a patient in need of such modulation.
